

AMENDMENT TO THE SPECIFICATION

Amend the paragraph at page 2, lines 15-19 as follows:

Using CGH, the chromosomal 20q13 region has been identified as a region that is frequently amplified in cancers (~~see, e.g. U.S. Patent No. 6,441,111~~). Initial analysis of this region in breast cancer cell lines identified a region approximately 2 Mb on chromosome 20 that is consistently amplified.
